

Vision

Create a better world through automation

Mission

Empowering the global automation community through standards and knowledge sharing

Membership | Training | Certification | Events

Standards | Conformity Assessment | Publications

Your Automation Toolkit

ISA offers so many **programs, services, and tools** for its members and for the broader automation community.

ISA by the Numbers

138 Standards 3,500 Volunteers 40 Countries

 ISA is an ANSI-accredited standards developer committed to open, consensus-based process

• ISA developed ISA/IEC 62443 standards – the world's only consensusbased automation and control systems cybersecurity standards

Our standards focus on:

Alarm Management for the Process Industries (ISA18) Batch Process Control (ISA88) Cybersecurity for Industrial Automation & Control Systems (ISA99 / 62443) Enterprise-Control System Integration (ISA95) Functional Safety - Safety Instrumented Systems (ISA84 / 61511) Human-Machine Interfaces (ISA101) Instrumentation Symbols and Documentation (ISA5 and ISA20) Intelligent Device Management (ISA108) Loop Checks, Calibration, Commissioning, and FAT/SAT (ISA105) Power Plants, Fossil and Nuclear (ISA77 and ISA67) Procedure Automation for Continuous Process Operations (ISA106) Valves / Valve Actuators (ISA75 and ISA96) Wireless Systems for Industrial Automation (ISA100) Additional Topics (ISA7, ISA12, ISA37, ISA60, ISA71, ISA76, ISA92)

Learn more: isa.org/standards

ISA Training

Developed by real-world experts.

Focused on the most relevant topics and vital technologies.

Unbiased and vendor neutral.

Flexible Formats

Classroom, virtual classroom, on site, instructor-guided online, and self-paced, modular formats

Build toward Certification

Document your skills and credentials with the opportunity to earn certificates and professional development credits

Taught by Experts

Courses are developed and taught by automation leaders and subjectmatter experts

Theory and Application

Lectures and hands-on exercises help deepen your knowledge

Learn more: isa.org/training

Types of Credentials

Certification

Has eligibility requirements, typically a combination of work experience and/or education

Valid for a limited time and requires renewal to keep the certification (certain requirements must be satisfied)

Is primarily based on job analysis of work performed in the field

Exam must be passed to achieve the certification

Certificate

Never expires

Is based exclusively on a body of knowledge taught in a training course or curriculum

Exam must be passed to achieve the certificate

Benefits of ISA Credentials

Individuals

- Documents education, knowledge, and experience
- Provides an objective, third-party assessment of skill levels
- Provides a tangible way to validate industry experience
- Increases preparation for additional job responsibilities

Employers

- Recognizes automation professionals with the appropriate credentials and helps accelerate workforce development
- Provides hiring and promoting qualifications for managers
- Promotes safety and efficiency
- Improves productivity and increases ROI by impacting mission-critical decisions

ISA Certification Programs

ISA Certified Automation Professional®

Demonstrates expertise and knowledge of automation and controls

ISA Certified Control Systems Technician®

Three levels – technician, specialist, master – to demonstrate knowledge of control systems

ISA Certificate Programs

Cybersecurity

Four certificates –
fundamentals,
risk assessment, design,
and maintenance –
with an expert tier for
achieving all four

NEW! - Automation Project Management Specialist

Program for project managers who need to execute automation projects effectively

Safety Instrumented Systems

Three certificates – fundamentals, selection, and verification – with an expert tier for achieving all three

CAP Associate

Validate job skills to excel as an automation professional

CST Associate

Validate job skills to excel as a control systems technician

Consortia and Conformity Assessment

 ISA leads collaborative forums for industrial cybersecurity and interoperability

ISASecure Certification Schemes:

- Component Security Assurance (CSA)
- IIoT Component Security Assurance (ICSA)
- System Security Assurance (SSA)
- Security Development Lifecycle Assurance (SDLA)
- IACS Security Assurance (IACSSA)

ISA100 Wireless:

- Device Certification
- System Certification
- Stack Certification

ISA Consortia Overview

LOGIIC - Research and development on cybersecurity topics for automation used by the oil and gas industry. O&G majors are members. www.Logiic.org

ISAGCA - Bridge the gap between ISA/IEC 62443 standards and market adoption. Lead cybersecurity culture transformation. https://isagca.org

ISASecure - ISA/IEC 62443 cybersecurity certification of COTS products, supplier development processes and automation at asset owner operating sites www.isasecure.org

ICS4ICS – Incident Command System for Industrial Control Systems establishes a standing organization and playbook for responding to cyber attacks on automation in critical infrastructure. www.ics4ics.org

ISA100 WCI – ISA100 Wireless Compliance Institute provides assured interoperability for wireless products conforming to the ISA100.11a (IEC62734) international wireless standard.

Topics and Markets Covered by ISA Content

Digital Transformation / Industry 4.0

IIoT - Industrial Internet of Things

- Edge Computing IT/OT Convergence
- Cloud Computing Smart Manufacturing
- Digital Twin Engineering
- Design and Simulation
- Virtual and Augmented Reality

Additive Manufacturing Data Analytics

- Artificial Intelligence
- Machine Learning
- Predictive & Preventative Control

Autonomous Vehicles Blockchain

Factory Automation and Machine Control

Machine Automation and Control

- Embedded Control
- Machine Tools, CNC and DNC Programmable Logic Controllers (PLCs), Programmable Automation Motion Control Controllers (PACs) Computer-based Controls Motors and Drives

Machine Safety Human Machine Interface

- HMI and OIT
- Mobile Devices Robotics Automatic Identification

Vision Systems Sensors & Industrial IO

Cybersecurity and Connectivity

Industrial and OT Cybersecurity Network Management and Protection Hardware and Devices Software Tools Wireless Networks

Network Protocols

- FDT Technology
- OPC and OPC UA
- EtherCAT
- Ethernet/IP
- PROFINET
- Sercos Interface
- EDDL Technology

Operations and Management

Asset Management

- Maintenance and Repair
- Leak Detection and Repair
- Overall Equipment Effectiveness (OEE) Workforce Management

Human Factors and Ergonomics Plant Facility Safety and Security

- Personnel Safety
- Electrical Safety Project Management Change Over and Migrations Corporate/ERP

MES and Operations Management Compliance & Regulations

Standards Alarm Management

- Situational Awareness Workforce Development and Training

Sustainability (Environment, Health and Safety (EHS))

- Environmental Management
- Energy Management
- Supply Chain Optimization

Process Automation and Control

Batch Control PID and Loop Control Process Safety

- Burner Management Systems
- Fire and Gas Systems Distributed Control Systems SCADA and RTU Instruments and Sensors
- Calibration and Test
- Process Composition Analysers and Techniques

- Signal Conditioning Final Control Elements
- Valves
- Pumps **Electrical Systems**
- Control Panels
- Marshalling Cabinets
- Industrial Computers
- Power Suppliers

Industry Segments

Agriculture

Aircraft, Aerospace

Automotive, Transportation Vehicles/Systems

Chemicals and Allied Products

Communications/Networking/Data Services

Computers, Electronics, and Semiconductors

Education and Training

Engineering Consulting/EPC

Ethanol Production

Fabricated Metal Products

Facilities/Building Management

Consumer Packaged Goods, Food, Beverage Glass, Concrete, Stone, and Clay Products

Government or Military

Industrial Machinery and Equipment

Instrumentation, Control, Test, Measurement **Systems**

Marine, Maritime

Medical Devices/Equipment

Metal Processing

Mining and Minerals

Oil, Gas, and Petroleum

Paper, Wood, and Allied Products

Pharmaceuticals, Life Sciences

Plastics and Rubber

Power Generation/Distribution

Smart Cities/Building Automation

Systems Integration/Value-Added Resellers

Textiles, Apparel, and Leather

Warehouse/Distribution, Logistics, Ports

Water/Wastewater

Events and Conferences

TradeTalks

ISA Membership Together, We Create the Future of Automation

Connect

- Engage in technical discussions on ISA Connect.
- Network with automation professionals through geographic sections.
- Build connections through conferences, webinars, and online discussions.

Grow

- Explore opportunities and build your resume with ISA Career Center.
- Post job openings and access over 50,000 automation professionals.
- Serve on a standards committee.

Learn

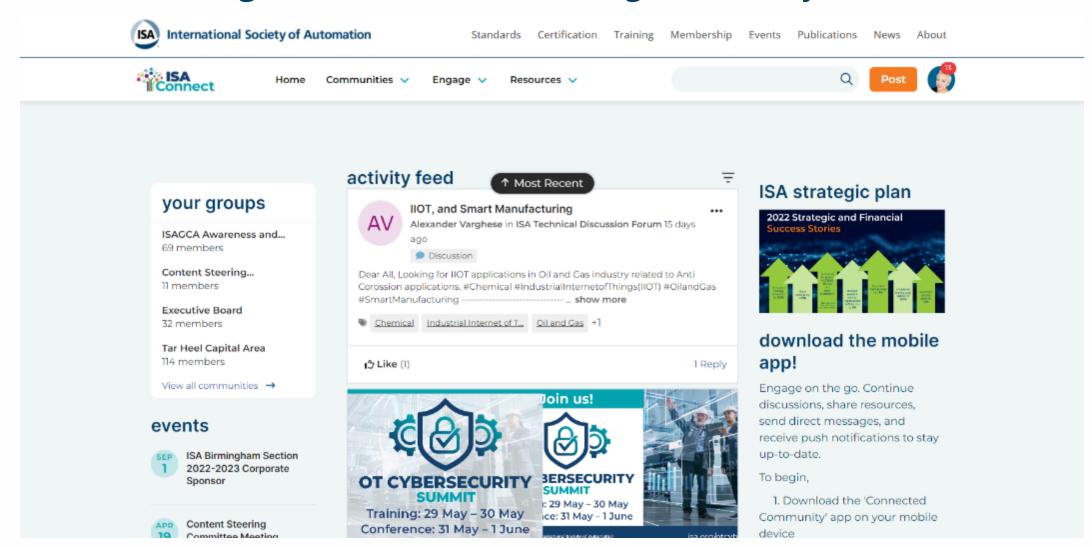

- Access over 150 standards that reflect leading industry expertise.
- Read the latest in industry information through our online news sources.
- Take training designed to build technical and leadership knowledge skills.
- Earn professional credentials that document your skills and set you apart.

ISA Connect

Award-winning technical and networking community

ISA Divisions

Members join divisions to **build their professional networks** and **receive information** around specific technologies and industries.

Aerospace/ Test Measurement

Analysis

Automatic Controls & Robotics

Automation Project Management & Delivery

Food & Pharmaceutical

Mining & Metals

Power

Process Measurement & Control

Building Automation Systems

Chemical & Petroleum

Construction & Design

Education & Research

Pulp & Paper

Safety & Security

Smart Manufacturing & IIoT

Water & Wastewater

16 Divisions

isa.org/divisions

ISA Sections

A section is a group of **professional**or student members who have
chosen to affiliate around a
specific geographic area.

Sections exist to support the mission and vision of the Society, governed by and subject to all policies and procedures set by ISA.

Sections develop activities in response to local needs.

108 Sections in **31** countries

80 Student sections

Resources

Career Planning, Young Professionals, and Students

<u>Career</u> <u>Center</u>

A valuable tool for candidates and hiring managers – post a position, share your resume, and search for career guidance in a community devoted to automation

ISA Business Academy

A 10-week mini-MBA program offering leadership training as part of a cohort of peers from the automation industry

Mentoring Program

Connecting early career professionals to more seasoned professionals who are willing to help coach, guide and share expertise

Young Professionals and Students

via the Young
Professionals
Committee and
Student Sections;
scholarship programs

But Don't Just Take Our Word for It

ISA events are where everybody comes together. It's high energy and everybody cares about where the industry is going.

The class was excellent, the program was excellent.

The certification programs are one of the best in the industry.

For me, the first thing I think of is 'family.'

In ISA you find mentors across all fields of your to help your career take off quickly.

I have met some of the **best people in automation** by being part of ISA.

Thank you
